

## **IN THE SPECIFICATION**

Please amend the specification as follows:

Please delete the paragraph on p. 9, lines 5-16 from the specification and replace it with the following revised paragraph:

FIG. 2 is a schematic diagram of the system architecture for the enterprise event organization and management system. A user 22 may access an event planning services site of the present invention via the internet 24, via a switch 26 and a router 27. The switch 26 and router are connected to a web server 28 for delivering content from the web server 28 to the user 22 via a network, such as the Internet 24. The web server 28 includes a computer processor for executing a computer program and a computer-readable storage medium for storing an executable computer program. The web server 28 is connected to a database 30, a file server 31, and a payment service interface (i.e. paymentech) 32, the payment service interface 32 being connected to a frame relay 33 for processing payments via a payment processing center 34. A firewall 40 provides security between the web server 28 and the database system 30, the payment service interface 32, and the file server 31, as well as between the web server 28 and the async boxes 36 and an SMTP server 38 for sending out emails over the Internet 24.
